

## "Basket of Series" in Time Series-DataBank

1. The series which you choose will automatically enter your "Basket of Series", when the caption "**Selected series are automatically entering the Basket of Series**" appears in red lettering, your "Basket of Series " is filling up.
2. When data with different frequencies are requested (such as monthly and quarterly), the "Basket of Series" will separate the data according to the its frequencies.
3. Each series in the "Basket of Series" can have different beginning and ending dates. Thus, it is possible that blanks will appear for specific series depending on the requested periods.
4. After the presentation in HTML format, data can also be formatted for EXCEL or Compact Dataset- XML.
5. The "Basket of Series" application allows presentation of up to 50 series and 3,000 items of data simultaneously.
6. The "Basket of Series" chosen is individualized and its properties are saved for an hour from the the time a user enters the Time Series-DataBank.
7. Future access to a "Private Basket of Series" can be saved in a personal computer by clicking "Add to Favorites". 
8. By clicking "RSS sevice - Private Basket "  [RSS feed - Private Basket](#) , connection is made to RSS feeds which will directly notify the personal computer of any updates of data in the "Private Basket of Series".
