(1) In order to chain the updated indices to the previous base, one should multiply them by the respective chaining coefficients.  
 (2) In order to chain the indices of 1985 to previous years they should be multiplied by 100.  
 (3) In order to chain the indices as of January 1986 to those of 1985, they should be multiplied by 2.25. In order to chain the indices as of January 1986 to those of previous years they should be multiplied by 225.
