

# CENTRAL BUREAU OF STATISTICS

## PREFACE

This publication is produced jointly by the Central Bureau of Statistics and the Ministry of the Interior, and includes physical data (population, education and welfare, infrastructure, etc.) and financial data (budget implementation) on local authorities in Israel in 2014.

The information included in this publication is intended to assist local authorities and central and local administrators and planners, as well as researchers, in their work on issues related to local government in Israel.

The data on all aspects of each local authority are presented in a consolidated form, in order to provide a concise profile of the local authority. In addition, comparative data on the various local authorities are presented.

For the first time, the publication presents data on land use of Local Authorities, the percentage of recycling from solid household, commercial, and yard waste, and number of children in preschools supervised by the Ministry of Education.

The publication was prepared by the Construction and Local Authorities Sector of the Central Bureau of Statistics, in consultation with the Municipal Research Sector in the Ministry of the Interior.

We would like to thank the staff of the Central Bureau of Statistics, the Ministry of the Interior, the National Insurance Institute and the Water Authority who assisted us.

Tali Tal

Senior Department Director  
Infrastructure-Economic Statistics
