## NATIONAL ACCOUNTS: FIRST ESTIMATION FOR THE FIRST QUARTER OF 2011: GDP INCREASED AT AN ANNUAL RATE OF 4.7%

### In the first quarter of 2011 (at an annual rate):

- 5.8% increase in business GDP
- 6.8% increase in the private consumption expenditure
- 23.7% a significant increase in fixed capital formation
- 16.0% increase in exports of goods and services
- 5.7% decrease in the public consumption expenditure

**The gross domestic product (GDP)**, at constant prices, after adjustment for the influence of the usual seasonality, increased by an annual rate of 4.7% in the first quarter of 2011, following an increase of 7.6% in the last quarter of 2010 and an increase of 4.8% in the third quarter.

**The rise in GDP in the first quarter of this year indicates an increase in the private consumption expenditure, in the exports of goods and services and in the public consumption expenditure. On the other hand, the public consumption expenditure decreased.**

*These findings come out from the first estimation of the national Accounts for the first quarter of 2011 that is based on the partial data that were obtained till now. \*\**

*The findings must be examined with caution due to the relatively large irregularity in the economic statistical series in Israel. This is reflected in strong fluctuations in the quarterly data that make it difficult to analyze the trend of the various time series, and especially to identify turning points in economic activity. The preliminary estimates of the economic development will be updated after reception of data for the missing months.*

\* The second estimation for the first quarter will be published on 16.06.11 and the third on 17.07.11
