INTRODUCTION

TERMS, DEFINITIONS AND EXPLANATIONS

TOURISM

Visitors: Tourists and day visitors¹ (including cruise passengers).

Tourists: Visitors with a foreign passport, who enter Israel under a tourist visa and leave it on a date other than the entry date (not the same day).

Does not include immigrants, immigrant citizens, potential immigrants, foreign workers and day visitors.

Day visitors: Visitors who enter and leave Israel on the same date (the same day). Including cruise passengers.

Cruise passengers: Visitors who enter Israel on a cruise, or on foreign navy vessels, who usually come for a day or two and spend nights on board the ship.

Israeli: An Israeli citizen or a permanent resident without Israeli citizenship, who goes abroad on an Israeli passport for any purpose. Israeli citizens residing abroad who pass the borders with an Israeli passport are also included.

Data on the total number of departures/entries of Israelis and the age data were obtained until March 1993 through a form filled-out by a departing/entering resident at the state's borders. This procedure was instated when the state was founded.

In April 1993 this form was canceled and since then, movement of Israelis at the borders (departures/entries) are recorded by computer and the tapes are transferred daily to the Border Control System of the Ministry of Interior. Problems in this system caused an especially great loss of data in 1994. Therefore, data were estimated for 1994, based on external sources of the border police and the Israel Airports Authority.

Data on main country of destination of Israelis and the purpose of their journey have been obtained through a sample survey conducted from 1994 until March 2000, when the survey ended. The survey population includes residents aged 15 and over who depart Israel via Ben Gurion Airport. The sample size is about 2% of all residents who depart in July and August, and about 3% of residents who depart in the other months.

¹ In 2007, due to the relaxation of criteria for provision of short-term visas to organized groups, there are day visitors who are not necessarily cruise passengers.

TOURIST ARRIVALS – LOGICAL CHECKS

Until the end of 1999, tourist files were received from the Ministry of Interior through the Compaq company. These files were based on entry of a form filled out by the tourists upon their arrival in Israel. As of 2000, these files are obtained from the Israeli Border Police, and they are based on entry of the tourist's details by controllers at the border checkpoints. Because the data consist of 1%–2% duplicate records, 2% was deducted in the final estimate of tourists for all data processed up to 2004.

At the beginning of 2005, a study of tourist files was conducted at the CBS, and the findings revealed that 6% of the records were duplicates. Consequently, 6% of the records were deducted in 2005.

Possible reasons for obtaining duplicate records in a file are:

1. A tourist with two last names was entered in two records.
2. Correction of incorrect data generates an additional record.
3. When a person has multiple citizenships, duplicate records are generated.
4. A superfluous click on the "enter" key creates duplicate files.

TABLE A. LOGICAL CHECKS FOR DUPLICATE RECORDS, 2004

Month	Published data	Data adjusted for duplicates	Difference	Percentage of error
Total	1,505,606	1,436,970	-68,636	-4.6
I	94,027	90,132	-3,895	-4.1
II	97,540	94,964	-2,576	-2.6
III	106,192	103,234	-2,958	-2.8
IV	141,559	135,837	-5,722	-4.0
V	118,326	112,421	-5,905	-5.0
VI	121,702	114,732	-6,970	-5.7
VII	147,901	140,134	-7,767	-5.3
VIII	176,910	167,230	-9,680	-5.5
IX	122,159	116,886	-5,273	-4.3
X	128,432	122,167	-6,265	-4.9
XI	110,430	106,308	-4,122	-3.7
XII	140,428	132,925	-7,503	-5.3

In 2004, the published data were 4.6% higher than the actual results on the average, after deducting only 2% of the duplicate records.

TABLE B. LOGICAL CHECKS FOR DUPLICATE RECORDS, 2005

Month	Published data	Data adjusted for duplicates	Difference	Percentage of error
Total	1,902,787	1,879,170	-23,530	-1.2
I	115,034	113,117	-1,983	-1.7
II	110,887	109,854	-1,046	-0.9
III	146,784	145,581	-1,219	-0.8
IV	162,639	165,703	3,103	1.9
V	171,887	167,471	-4,429	-2.6
VI	157,315	159,349	2,049	1.3
VII	199,145	196,402	-2,698	-1.4
VIII	193,718	188,432	-5,268	-2.7
IX	156,807	152,626	-4,174	-2.7
X	162,748	160,631	-2,067	-1.3
XI	163,292	162,483	-817	-0.5
XII	162,531	157,521	-4,979	-3.1

Comparison of the published data with data adjusted for duplicates reveals that the data published for most of the months in 2005 were very close to the results obtained after deducting the duplicate records, following the adjustment of the general deduction to 6% in 2005.

TABLE C. COMPARISON BY SELECTED COUNTRIES, 2004

Country	Published data	Data adjusted for duplicates	Difference	Percentage of error
Austria	11,117	11,209	92	0.8
Italy	41,990	41,812	-178	-0.4
Argentina	11,734	10,136	-1,598	-13.6
United States	379,127	382,619	3,492	0.9
Belgium	22,762	22,589	-173	-0.8
Brazil	11,415	9,747	-1,668	-14.6
Germany	75,896	68,016	-7,880	-10.4
Netherlands	40,379	36,257	-4,122	-10.2
United Kingdom	146,483	148,410	1,927	1.3
Spain	21,396	13,671	-7,725	-36.1
France	257,486	226,732	-30,754	-11.9
Canada	43,571	44,187	616	1.4
Sweden	12,596	12,816	220	1.7

Substantial discrepancies were revealed for Spanish-speaking countries, because individuals have multiple family names. Therefore, the amount of duplicate records in Spain was as high as one-third. In France, the number of duplicate records was also relatively high.

TABLE D. COMPARISON BY SELECTED COUNTRIES, 2005

Country	Published data	Data adjusted for duplicates	Difference	Percentage of error
Austria	13,264	13,909	645	4.9
Italy	72,874	76,466	3,592	4.9
Argentina	14,776	13,299	-1,477	-10.0
United States	457,518	477,984	20,466	4.5
Belgium	25,523	26,502	979	3.8
Brazil	19,763	16,512	-3,251	-16.4
Germany	105,224	97,240	-7,984	-7.6
Netherlands	49,808	46,223	-3,585	-7.2
United Kingdom	156,748	164,942	8,194	5.2
Spain	51,867	34,006	-17,861	-34.4
France	311,438	284,032	-27,406	-8.8
Canada	50,784	53,505	2,721	5.4
Sweden	18,334	18,865	531	2.9

The number of tourist arrivals per month after deducting 6% was similar to that obtained from the logical check. However, for some countries the deduction had to be conducted differentially.

AIR TRANSPORT

As of the Quarterly No. 4, 2017, the tables on air transport are not included. These tables can be found in the Transport Statistics Quarterly.

INCOME AND EXPENDITURE ON TOURISM IN FOREIGN CURRENCY

Income in foreign currency from tourists in Israel includes foreign tourists' expenses in Israel on goods and services. Not included: income of Israeli shipping companies and airlines from fares on international lines, and also expenses of foreign diplomats in Israel are not included.

It should be mentioned that expenses of foreign workers in Israel are presented in the Balance of Payments together with income from tourists in the item **income from tourism**.

According to the World Tourism Organization (W.T.O), the expenses of foreign workers are not defined as income from tourism. Therefore, as of Quarterly No. 2, 2002, data on income from tourists are also presented separately.

Expenditure of Israelis travelling abroad includes expenditure of Israeli residents going abroad as tourists, on business, as students, for health reasons, etc. excluding the cost of flight tickets. The sums do not include travel allowances spent abroad by government employees traveling on business (regarded as a government expenses).

A correction of expenditure of Israeli residents travelling abroad

Data on expenditure abroad of Israeli residents were corrected as of the Quarterly No. 2, 1999, in light of results emanating from "Expenditure of Israelis Travelling Abroad Survey" which was conducted during 1997 and a few months during 1998. The population of the survey included all Israelis who stayed abroad at least on day (and up to a year) during the year.

The survey questioned Israelis returning from abroad about the sum of their expenditure abroad – whether they paid in advance (in Israel) or whether they paid during their stay abroad. Furthermore, they were questioned on the purpose and destination of their trip. The survey population did not include Israelis whose length of stay abroad exceeded one year nor Israelis living abroad who came to Israel for a visit. This survey is the first of its kind to be conducted in Israel and is meant to improve the quality of data on imported services.

A comparison between data from the survey and data published up to now reveals that the average daily expenditure is similar in both methods, but the average tourist days taken into account was different. In the method used up to now, tourist days of Israelis living abroad who came for a visit were also included (they should not be included in the payment balance).

Although the number of Israelis living abroad who came to Israel for a visit is relatively low, their contribution to the number of tourist days is high (due to the fact that they are abroad most of the time) – and this is where the data were corrected (a reduction in expenditure abroad).

Correction of data is as of 1990.

Income of Israeli companies from fares on international lines includes also income from passengers who did not arrive in Israel.

HOTELS, RURAL TOURISM, YOUTH HOSTELS AND FIELD SCHOOLS

1. HOTELS

A) Tourist hotels

Tourist Hotels (listed)

In the past, these hotels were called "hotels recommended for tourists." This definition includes hotels, guest houses, holiday villages, apartotels, and mini-suite hotels which are listed for tourists by the Ministry of Tourism.

B) Other Hotels

This population includes hotels and other types of accommodations not included in section a above, and which are not defined as "youth hostels affiliated with the Association of Youth Hostels", "Christian hospices", "rural tourism in kibbutzim and collective moshavim" and "field schools with hostels" (all, excluding "Christians hospices" are investigated as separated series).

The data for this population are obtained by means of a sample. In 1997 a new sample was drawn including about 50 hotels.

Data for 1997 are presented twice, based on the two samples.

The data obtained based on the new sample for 1997 include approximately 3,300 rooms and approximately 10,500 beds (on average per month) – 3 times greater than the number of rooms obtained based on the old sample, and 4.6 times greater than the number of beds. The total number of person-nights is 3.6 times greater.

GRADING AND CLASSIFICATION OF TOURIST HOTELS

An extensive explanation on graduation of hotels by stars and the transition from the old grading to the new grading appears until Quarterly No. 1, 1993.

Abolition of grading: According to an ordinance of the Minister of Tourism, hotel gradings were abolished as of the middle of May 1992. As of this date, it is prohibited to publish statistical data according to the previous gradation. consequently, data beginning with June 1992 are published only by locality.²

Classification of Hotels by Level. The new ordinance made it necessary to determine an alternate classification for hotels which would enable an improved analysis of the data. A number of possibilities were examined (such as by number of rooms in the hotel or by number of employed persons per room). It was decided to

² Data up to May 1992, according to grades, were published up to Quarterly No. 1, 1993.

divide the hotels, which have been graded 1 star – 5DL, into four levels, based on two characteristics: character of the hotel (recreational/urban), and the average size of a double room (excluding suites and public areas).

Level I represents the deluxe hotels, Level II is equivalent to 4 stars, Level III is equivalent to 3 stars, and Level IV is equivalent to a 2-star hotel.

The definition remained in effect for hotels, that had been defined as holiday villages and "other" (apartment hotels and mini-suite hotels).

The character of the hotel (recreation/urban) and the sizes of the rooms in the hotels were obtained from the file of data which had previously been collected by the Ministry of Tourism for the purpose of re-grading hotels. For hotels which were not examined at that time, and hotels which opened at a later date, the hotel's character and size were determined according to the hotel's building permit, as it appears in the Ministry of Tourism's database.

Rooms: Rooms with at least one bed intended for guests. Not included are the following: offices (of the hotel or rented out), dining rooms, function rooms, store rooms, apartments not available for renting to others, etc. A suite is counted as one room.

The number of rooms **includes** rooms in temporarily closed hotels (due to renovations or seasonal reasons), as well as rooms in hotels temporarily closed due to low profitability resulting from the security situation beginning in October 2000. **Not included** are rooms in hotels which were transformed into immigrant absorption centres.

Beds: Beds permanently provided in hotels in the previously mentioned rooms. Double beds are counted as two beds. Excluded are cribs and temporary beds for children.

Guest: A person (including a child) booking into a hotel and spending at least one night at the hotel (including persons exempted from payment). A guest who left the hotel and booking into it for a second time (even within the same month) is counted as two guests.

Tourist: A guest who registers at the hotel with a foreign passport.

Israeli: A guest who registers at the hotel with an Israeli identity card.

Person-nights: All person-nights in the hotels, except person-nights spent in owned apartments not rented to others.

Potential person-nights (beds): The number of beds (as defined above) multiplied by the number of nights the hotel was open during the month reported.

Percentage bed-occupancy: Total actual person-nights, expressed as a percentage of the total potential person-nights in hotels, during the period reported.

Potential rooms: The number of rooms (as defined above), multiplied by the number of nights the hotel was open during the month reported.

Percentage room occupancy: Total rooms occupied, expressed as a percentage of total potential rooms available at hotels, during the period reported.

REVENUE, EMPLOYMENT AND WAGES

Tourist Hotels

Previous sample

Until the end of 1988 the data were obtained by means of a sample of recommended tourist hotels, which was produced in the seventies. The data processed on the basis of this sample were acceptable at a national level, but details by tourist locality were not available.

New sample

Because of the change to the new rating of hotels, their dynamic development and the need for information according to locality, it was decided to draw a "new sample" which would make this information available in the necessary detail. All hotels graded 5 star deluxe, 5 star and 4 star, and hotels with 100 or more rooms were certainly included. The rest of the hotels were selected for the sample on a probability basis, based on each hotel's grade and number of rooms. Accordingly, processing of the sample for the overall population was based on the grade of the hotel. Beginning with data from early 1989, the data are obtained on the basis of the new sample.³

Due to the abolition of hotel grading,⁴ and the changeover to processing the sample data for the overall population as based on level of hotel,⁵ slight changes in the data were obtained: on the national level of about 1%. At the locality level higher differences were obtained in some localities.

³ In order to understand the changes obtained from the exchange of the samples, the December 1988 data were processed according to both the previous sample and the new sample. These data were published up to Quarterly No. 1, 1991.

⁴ Data according to grades up to May 1992 were published up to Quarterly No. 1, 1993.

⁵ See "Classification of Hotels by Level", above.

In order to obtain continuity and to facilitate analysis of data according to levels over a period of time, data were reprocessed on the basis of hotel level, as of January 1991.

For the reader's convenience, the data for 1991 were presented twice, beginning with Quarterly No. 3, 1993 and until Quarterly No. 4, 1994.

1991 * processing by grade

1991 ** processing by level

As of Quarterly, No. 1, 1995, data for 1991 are presented according to the processing based on level of hotel.

Addition to sample – Not Yet Listed Hotels

Starting in the last quarter of 1994, the sample used for collecting data on employed persons, wages and revenue was expanded to include hotels not yet listed as "tourist hotels" (see explanation above).⁶

It should be clarified that the ratio of total revenue can not be relied upon for the last quarter of 1994 between the data based on the expanded sample and the data based on the original sample (tourist hotels only), for estimating data for the earlier period. This is because the activities of not yet listed hotels are weighted differently for different periods. However, an estimate of data can be obtained for the previous period, which relates to the expanded sample, by using the data on person-nights and the ratio of average revenue per person-night at each level.

It should be noted that since the data are based on a sample, which is based on the inflation method also on national data on averages per room, may be slightly inaccurate. Thus, for example, data show that for Haifa, there were no not yet listed hotels in the surveyed period:

TABLE E. TOTAL REVENUE – NIS thousand

1994	From tourist hotels	From tourist hotels and not yet listed hotels
X	7,140	7,139
XI	6,569	6,575
XII	6,195	6,203

⁶ Data until the end of 1994, which relate to tourist hotels only, and data in the last quarter of 1994, which relate to the expanded sample, are presented up to Quarterly No. 1, 2000.

Jobs (formerly: Employed persons): Employees and proprietors and members of their families working at the hotel without pay (In hotels in kibbutzim it includes also posts held by kibbutzim members and volunteers working without pay, classified as proprietors and family members). Excludes workers employed by personnel agencies.

Employee jobs (formerly: Employees): Persons who worked in a hotel for at least one day in the month and received wages, including part-time employees and proprietors and shareholders drawing a wage or salary from the hotel.

Wages: The sums appearing on the pay-rolls for the reported month, and on which income tax is due, including basic wage, overtime, various taxable allowances such as: cost of living allowance, seniority, professional literature, fares, convalescence allowance, maintenance of vehicle (excluding insurance and license) telephone maintenance, payment for clothing, 13th month salary, premiums, bonuses etc., and also payments in kind (such as housing), which require payment of income tax. Until the reform in the wages structure in the hotel industry, wages also included service charges (whether paid directly by the employer, or distributed directly among the employees from a common pool). **Excluded** are sums paid to the employee, on which the employee does not have to pay income tax, such as: food and lodging allowances, meals allowance on which the employee does not pay tax, compensation payments, pension and services charges not paid by the employer or not distributed from a common pool. Other labour expenses paid by the employer (social security) are also excluded.

Kibbutz members and volunteers who work in hotels in kibbutzim and moshavim are defined, as mentioned above, as proprietors and family members. Thus, wages are not imputed for them.

Revenue: Includes gross revenue (including value added tax⁷) from person-nights (including person-nights in rooms rented by the hotel in private homes), from renting rooms for a long period. It also includes revenue from other services which are not person-nights, such as: organizing parties and renting halls, stay during the day without spending the night, deposits for canceled rooms, meals, drinks, bars, night

⁷ Since November 1985, VAT on revenue from hotels in Elat, which became a Free Trade Zone, has been rescinded.

The distinction between revenue from tourists and from Israelis is made based on the definition "revenue from tourists is exempt from VAT and revenue from Israelis is due VAT at a zero rate".

clubs, swimming pools, laundry, rentals of shops etc. It also includes payments received from the workers (for meals, housing, etc.). Incentives are not included.⁸

Revenue from tourists: Revenue from accommodation and other services of "tourists" who do not pay value-added tax (excluded revenue from tourists not staying at the hotel, who pay value-added tax for other services at the hotel).

Revenue from Israelis: The difference between the total revenue and the revenue from tourists as defined above. Revenue from Israelis includes revenue from lodging and services for Israeli guests, revenue from events and rental of areas as well as revenue from tourists on which VAT was paid.

The revenue from tourist in U.S. dollars and the average revenue for person-nights in U.S. dollars are calculated from the revenue reported in NIS, or other currencies, at the average representative exchange rate for the month.

The data on rooms and person-nights, used for the calculation of derived data (revenue per room and per person-night) are sample data and are not data obtained from the census.

Other hotels

As of January 1997, other hotels are also investigated on revenue, employment and wages (see definitions above). Data are based on the new sample of these hotels. See explanation above.

2. RURAL TOURISM IN KIBBUTZIM AND COLLECTIVE MOSHAVIM

In 1996, this market sector was investigated for the first time.

Population: All other accommodations that exist in kibbutzim and collective moshavim, which are not investigated within the framework of other series. The population **includes:** individual accommodation units (rooms, apartments), hostels, camping grounds, "Seminar Centers", etc. It **does not include:** guesthouses listed as tourist hotels (see above), youth hostels affiliated with the youth hostel association or field schools located on kibbutzim (see below).

Percent Bed Occupancy: See above definition under "Hotels".

Revenue: Total revenue obtained from guests who spend the night (for accommodation and other services such as: meals, use of facilities, etc.), incl. VAT.

⁸ The hotels received compensation from the exchange rate insurance since 1981. On 25.7.93, this compensation was discontinued. A table that presents the outline of the annual receipts was presented in the quarterlies from 1/1995 and until 2/1998.

3. PRIVATE RURAL TOURISM

From the beginning of 2005, this market sector was investigated for the first time.

Population: All rural accommodations in rural villages except those in kibbutzim and collective moshavim.

Percent Bed Occupancy: See above definition under "Hotels".

Revenue: Total revenue obtained from guests who spend the night (for accommodation and other services such as: meals, use of facilities, etc.), incl. VAT.

4. YOUTH HOSTELS

Youth hostels affiliated with the Youth Hostels Association, (among them, one in the Ezyon Region).

5. FIELD SCHOOLS

Field schools which belong to Society for the Protection of Nature run a number of programs – instruction of participants in excursions, activities with the population in the immediate neighborhood, Research of the region and activities for the preservation of nature and environment. Field schools run also youth hostels.

6. NATIONAL PARKS AND NATURE RESERVES

Data are received from the Authority.

SEASONAL ADJUSTMENT AND CALCULATION OF TRENDS⁹

The seasonal adjustment method is based on the use of moving averages to estimate seasonal factors, for each month. The seasonally adjusted series is calculated by using the Statistics Canada X-12-ARIMA¹⁰ Seasonal Adjustment Method and by a procedure developed in the Central Bureau of Statistics for simultaneous estimation of factors for prior adjustment of Festivals (Passover, Easter, and the Jewish New Year) and Trading Day effects in Israel¹¹.

Prior adjustment of the effects of festivals and of Trading Day is implemented for most series on a monthly basis before seasonal adjustment.

The seasonally adjusted series is calculated by dividing the original series both by the seasonal factors and by the prior adjustment factors when applicable. The seasonally adjusted series is the first estimate of the trend and includes irregular fluctuations.

As of April 1992, the method of Concurrent Seasonal Adjustment is applied, i.e., the seasonally adjusted series is calculated each month, on the basis of the most updated original data.

In the series "**tourist arrivals by air**", seasonal adjustment is applied to the aggregate series as well as to 12 main sub-series separately (**arrivals by country of residence**). In the series "**person-nights at tourist hotels**", the aggregate data (total and by localities) is calculated by summing up the seasonally adjusted data of the two sub-series (person-nights of tourists and person-nights of Israelis).

The trend is estimated by an improved method, which is based on Henderson's method and on an additional process.¹¹

⁹ The seasonally adjusted series and trends were calculated and the trend breaks were dealt with under the supervision of the Statistical Analysis Sector of the Central Bureau of Statistics.

¹⁰ U.S. Census Bureau – The X-12-ARIMA Seasonal Adjustment Method.

¹¹ A detailed [explanation of the method of seasonal adjustment and estimation of trends](https://old.cbs.gov.il/www/publications/tseries/seasonal18/presentationh18.pdf) was published in Seasonal and Prior Adjustment Factors for 2015, Trends for 2011–2015 (on the CBS website only: Definitions, Classifications and Methods, Statistical Methods, Time Series).
<https://old.cbs.gov.il/www/publications/tseries/seasonal18/presentationh18.pdf>

A trend break in the series: As of October 2000 (due to the security situation in Israel) and again as of July 2006 (due to the Second Lebanese War) the original data recorded in the series of incoming tourism (total and by country) and tourist person-nights in hotels (total and by locality) were extremely irregular. Mainly, abrupt changes in the levels of original data, i.e., trend breaks in the series were detected. Therefore, calculation of seasonally adjusted data and trend data were carried out after adjusting the data up to September 2000 and June 2006, respectively, to the low levels received during the first months of each crisis.

TABLES

(Presented in Hebrew order – from right to left)

EXPLANATORY NOTES

Area Covered by the Statistical Data

The statistical data relate to the economic territory of the State of Israel, unless otherwise stated.

A. The economic territory of a country (according to the definition of the OECD-SNA. For a detailed definition, see: OECD, Glossary of Statistical Terms): The economic territory of a country consists of the geographic territory administered by a government within which persons, goods and capital circulate freely.

The economic territory of the State of Israel: According to this definition, the economic territory of the State of Israel is as indicated in paragraph B below.

B. District and Sub-District:

The districts and sub-districts are defined according to the official administrative division of the State of Israel, which includes 6 districts and 15 sub-districts.

Including Israeli localities in the Judea and Samaria Area.

Due to the Coronavirus (COVID-19) pandemic, the data for the years 2020 and 2021 are atypical, and the monthly data for these years do not appear in the tables.

Starting in October 2023, person-night and guest data include person-nights of evacuees, and the revenue includes the payments to Hotels for accommodation of evacuees.

Special Symbols in the Tables

Blank space = Irrelevant due to the table's structure

- = No cases

.. = Unknown or not for publication

0 = A value smaller than half the unit by which data are presented in the table

* = Provisional data

R = Revised data

() = Data based on estimates, or data based on a small number of cases, or data with a relative sampling error which is high

NIS = New Israeli Sheqel

Details do not necessarily add up to totals because of rounding.

(1) As presented in the Balance of Payments.
See explanation in the Introduction.

(2) The data include estimates of income from tourists
and expenditure of foreign workers in Israel.

(3) Excl. the expenditures on international flights.

(4) Incl. international lines between foreign ports.

(1) כפי שמוצג במאזן התשלומים.
ראו הסבר במבוא.

(2) הנתון כולל אומדנים של הכנסות מתיירים
והוצאות של עובדים זרים בארץ.

(3) ללא הוצאות על טיסה בקווים הבין-לאומיים.

(4) כולל בקווים בין-לאומיים בין נמלים זרים.

(1) Tourist hotels and other hotels -

see explanations in the introduction.

(2) Other hotels data are based on a new sample.

(3) The annual and cumulative data are monthly averages for the period.

(4) Incl. in hotels temporarily closed.

(5) Calculated by dividing the number of potential room/beds by number of days in each month.

(6) In open hotels.

(1) מלונות תיירות ומלונות אחרים -

ראו הסברים במבוא.

(2) נתוני מלונות אחרים מבוססים על מדגם חדש.

(3) הנתונים השנתיים והצטבריים הם

ממוצעים חודשיים לתקופה.

(4) כולל במלונות סגורים זמנית.

(5) מחושב על סמך חלוקת החדרים האפשריים/המיטות האפשריות במספר הימים בכל בחודש.

(6) במלונות הפתוחים.

(1) Incl. hotels temporarily closed.

(2) End of period.

(3) The data are averages for the period.

(4) Calculated by dividing the number of potential rooms/beds by number of days in each month.

(5) In open hotels.

* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.

** Data on person-nights of residents who were evacuated due to the Iron Swords War (under the framework of the government plan or on their own), and who were placed in tourist hotels, are based on reports to the National Digital Agency's "Yachad" system.

(1) כולל מלונות סגורים זמנית.

(2) סוף תקופה.

(3) הנתונים הם ממוצעים לתקופה.

(4) מחושב על סמך חלוקת החדרים האפשריים/המיטות האפשריות במספר הימים בכל חודש.

(5) במלונות הפתוחים.

* במערכת הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון. אורחים ששהו כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.

** הנתונים על לינות התושבים שפונו בעקבות מלחמת "חרבות ברזל" (במסגרת התוכנית הממשלתית או ביוזמה עצמית) ושנקלטו במלונות תיירות, מבוססים על הדיווחים למערכת "יחד" (מטעם מערך הדיגיטל).

**TABLE 22.- ROOMS, BEDS, PERSON-NIGHTS AND BED OCCUPANCY

(1) No data are presented, because in some months

fewer than 3 hotels were open.

* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.

(1) לא מוצגים נתונים כי בחלק מהחודשים

היו פחות מ-3 מלונות פתוחים.

* במערכת הדיווח של המלונות אוהר נרשם פעם אחת בלבד, ביום כניסתו למלון. אורחים ששהו במלונות מספרים ידן פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.

(1) In opened hotels.

(2) No data are presented, because in some months fewer than 3 hotels were open.

* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered.

Therefore, the monthly data of number of guests is not relevant.

(1) במלונות הפתוחים.

(2) לא מוצגים נתונים כי בחלק מהחודשים היו פתוחים פחות משלושה מלונות.

* במערכת הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון. אורחים ששהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.

לוח 34- לינות ותפוסה במלונות תיירות,

(1) Incl. hotels temporarily closed. (2) End of period. (3) The annual and cumulative data refer to the end of each period. (4) The annual and cumulative data are monthly averages for the period. (5) Calculated by dividing the number of potential room/beds by number of days in each month.

* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.

(1) See also table 52. (ראו גם לוח 52.)
 (2) The annual and cumulative data refer to the end of each period. (הנתונים השנתיים והמצטברים מתייחסים לסוף כל תקופה.)
 (3) Incl. hotels temporarily closed. (כולל מלונות סגורים זמנית.)
 (4) The annual and cumulative data are the monthly averages for the period. (הנתונים השנתיים והמצטברים הם ממוצעים חודשיים לתקופה.)
 * In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. (במערכת הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון.)
 * אורחים ששהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם.
 * על נכון הנתון החודשי של מספר האורחים אינו רלוונטי.

(1) See also table 52. (2) The annual and cumulative data refer to the end of each period. (3) Incl. hotels temporarily closed. (4) The annual and cumulative data are the monthly averages for the period * In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.

(1) ראו גם לוח 52. (2) הנתונים השנתיים והמצטברים מתייחסים לסוף כל תקופה. (3) כולל מלונות סגורים זמנית. (4) הנתונים השנתיים והמצטברים הם ממוצעים חודשיים לתקופה. * במערכת הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון. אורחים ששהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.

(1) At current prices.

(2) The annual and cumulative data are monthly averages for the period.

(3) Additional jobs.

(4) Sum of Jobs and Jobs of workers hired by Employment Agencies.

(1) במחירים שוטפים.

(2) הנתונים השנתיים והצטבריים הם ממוצעים חודשיים לתקופה.

(3) משרות נוספות.

(4) סכום המשרות והמשרות דרך חברות כוח אדם.
