59. Rooms, Beds, Person-Nights and Bed Occupancy, in Field Schools..... 144

MISCELLANEOUS

60. Visits and Income in Israel Nature and Parks Authority Sites, by Type of Site 147

61. Visits in Israel Nature and Parks Authority Sites, by Type of Site and District 148

TABLES

(Presented in Hebrew order – from right to left)

EXPLANATORY NOTES

Area Covered by the Statistical Data

The statistical data relate to the economic territory of the State of Israel, unless otherwise stated.

A. **The economic territory of a country** (according to the definition of the OECD-SNA. For a detailed definition, see: OECD, Glossary of Statistical Terms): The economic territory of a country consists of the geographic territory administered by a government within which persons, goods and capital circulate freely.

   The economic territory of the State of Israel: According to this definition, the economic territory of the State of Israel is as indicated in paragraph B below.

B. **District and Sub-District:**

   The districts and sub-districts are defined according to the official administrative division of the State of Israel, which includes 6 districts and 15 sub-districts.

   Including Israeli localities in the Judea and Samaria Area.

Due to the Coronavirus (COVID-19) pandemic, the data for the years 2020 and 2021 are atypical, and the monthly data for these years do not appear in the tables.

Starting in October 2023, person-night and guest data include person-nights of evacuees, and the revenue includes the payments to hotels for accommodation of evacuees. In Table 21, unlike the other tables, estimates of person-nights by evacuees in tourist hotels are also presented.

For further information, see Explanations (Metadata) – Tourism

Special Symbols in the Tables

Blank space = Irrelevant due to the table's structure

\- = No cases

.. = Unknown or not for publication

0 = A value smaller than half the unit by which data are presented in the table

* = Provisional data

R = Revised data

( ) = Data based on estimates, or data based on a small number of cases, or data with a relative sampling error which is high

NIS = New Israeli Sheqel

Details do not necessarily add up to totals because of rounding.

תיירות

(1) Incl. hotels temporarily closed.
(2) End of period.
(3) The data are averages for the period.
(4) Calculated by dividing the number of potential rooms/beds by number of days in each month.
(5) In open hotels.
* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.
** Data on person-nights of residents who were evacuated due to the Iron Swords War (under the framework of the government plan or on their own), and who were placed in tourist hotels, are based on reports to the National Digital Agency's "Yachad" system and to the Ministry of Tourism.

(1) כולל מלונות סגורים זמנית.
(2) סוף תקופה.
(3) הנתונים הם ממוצעים לתקופה.
(4) מחושב על סמך חלוקת החדרים האפשריים/המיטות האפשריות במספר הימים בכל חודש.
(5) במלונות הפתוחים.
* במערכות הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון. אורחים ששוהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.
** הנתונים על לינות התושבים שפונו בעקבות מלחמת "חרבות ברזל" (במסגרת התוכנית הממשלתית או ביוזמה עצמית)" ושנקלטו במלונות תיירות, מבוססים על הדיווחים למערכת "יחד" (מטעם מערך הדיגיטל) ולמשרד התיירות.

(1) No data are presented, because in some months fewer than 3 hotels were open.

(1) לא מוצגים נתונים כי בחלק מהחודשים היו פתוחים פחות משלושה מלונות.

* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.

* במערכות הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון. אורחים ששוהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.

(1) In opened hotels.
(2) No data are presented, because in some months fewer than 3 hotels were open.
* In the hotel reporting system, a guest is recorded only once on the date of registration at the hotel. Guests who stay several months (such as the evacuees) are counted only once in the month they registered. Therefore, the monthly data of number of guests is not relevant.

(1) במלונות הפתוחים.
(2) לא מוצגים נתונים כי בחלק מהחודשים היו פתוחים פחות משלושה מלונות.
* במערכות הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון. אורחים ששוהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם, ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.

(1) Incl. hotels temporarily closed.
(2) End of period.
(3) The annual and cumulative data refer to the end of each period.
(4) The annual and cumulative data are monthly averages for the period.
(5) Calculated by dividing the number of potential room/beds by number of days in each month.
* In the hotel reporting system, a guest is recorded only once, on the date of registration at the hotel.
Guests who stay several months (such as the evacuees) are counted only once in the month they registered.
Therefore, the monthly data of number of guests is not relevant.

(1) כולל מלונות סגורים זמנית.
(2) סוף תקופה.
(3) הנתונים השנתיים והמצטברים מתייחסים לסוף כל תקופה.
(4) הנתונים השנתיים והמצטברים הם ממוצעים חודשיים לתקופה.
(5) מחושב על סמך חלוקת החדרים האפשריים/המיטות האפשריות במספר הימים בכל חודש.
* במערכות הדיווח של המלונות אורח נרשם פעם אחת בלבד ביום כניסתו למלון.
אורחים ששוהים כמה חודשים (כמו המפונים) נספרים רק פעם אחת בחודש כניסתם,
ועל כן הנתון החודשי של מספר האורחים אינו רלוונטי.
